

TRACEOLAB – 10 YEARS

Thursday 26th Baixa October 2023

Anniversary conference

Salle des Professeurs, Place du 20-août 7, 4000 Liège

***Functional analysis – reflections on how it evolved and where to go next**

9h15-9h35. Veerle Rots, *The role and concept of functional studies: views from TraceoLab*

9h35-10h05. Richard Fullagar (Univ. Flinders & Western Australia), *Australian approaches to functional analysis, grinding stones and ground stone implements*

10h05-10h35. Andreu Ollé (IPHES/URV, Tarragona), *Designing a multi-technique approach for the study of use-wear and residues on stone tools*

10h35-10h50. Discussion (discussant: Lena Asryan)

***A view from technology**

10h50-11h20. Guillaume Porraz (CNRS, Univ. Aix-Marseille), *Rewinding stone tools from Diepkloof at TraceoLab*

11h20-11h40. Antonin Tomasso (CNRS, Univ. Nice), *From lithic gear to production systems: the potential of an integrated techno-economic approach – on-line*

11h40-12h10. Alice Leplongeon (KULeuven), *Replicability in lithic analysis: some thoughts on the results from a recent experimental study and their implications for the analysis of the African Stone Age lithic record*

12h10-12h35. Discussion (discussant: Noora Taipale)

12h35-13h35: Lunch

***Knapping techniques and skill**

13h35-13h55. Lars Anderson (Univ. Paris-Nanterre) *Learning to be Aurignacian : the structure and practice of lithic apprenticeship among communities established in Southern France – on-line*

13h55-14h15. Cécile Ménager (ArchéOrient) – *An experiment on indirect percussion*

14h15-14h30. Discussion (discussant: Olivier Touzé)

***Palaeolithic sites and their potential**

14h30-15h00. Jean-Luc Locht (INRAP), *Functional analyses of Early and Middle Palaeolithic lithic industries in Northern France: state of the art and research perspectives*

15h00-15h10. Discussion (discussant: Sonja Tomasso)

***Projectiles and hunting strategies**

15h10-15h30: Justin Coppe, *How to move beyond weapon identification towards an understanding of past hunting strategies?*

15h30-16h00. Geoff Smith (Univ. Kent), *Missing the point(s): a zooarchaeological perspective on human hunting technology and behaviour*

16h00-16h15: Discussion (discussant: Lola Tydgadt)

***What's next for residues? Taphonomy and the potential of proteins**

16h15-16h30. Dries Cnats, *Ten Years of Fundamentals: Crafting TraceoLab's framework for Interpreting residues*

16h30-16h50. Yolanda Fernandez-Jalvo (CSIC, Madrid), *Traceology and taphonomy: an exchange of perspectives – on-line*

16h50-17h20. Matthew Collins (Univ. Cambridge & Univ. Copenhagen), *What do we know about longevity of biomolecules on surfaces and what do we not know?*

17h20-17h35. Discussion (discussant: Ronè Oberholzer)

17h35-17h40. Closing remarks

***Public lecture**

18h-19h. Lawrence Barham (Univ. Liverpool), *The earliest wood structure in the world found at Kalambo Falls, Zambia: a journey of discovery*

19h-19h15. Discussion

19h15. Drinks

Free entrance but please register: traceolab@uliege.be or →
